

Corn Trial Results:

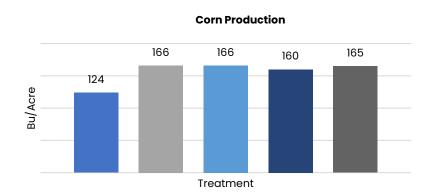

Objective

Evaluate the impact that AgriTec International's general corn production recommendations have on soil profile characteristics.

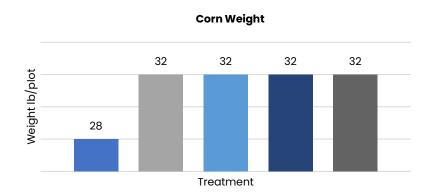

Overview:

Control plot received 200 units N, 50 units P, and 100 units K. There were 4 testing plots that received variations of AgriTec fertilizer programs.

Control
Calcium, Nitro-Maxx+, 3-18-18+
Calcium, 25-0-0, 3-18-18+, Folar-Act
Calcium, Nitro-Maxx, 3-18-18+, Folar-Act
Nitro-Maxx+, 3-18-18+, 0-0-30
